

BillAR

Augmented reality game on a pool board

Bordeaux INP
ENSEIRB
MATMECA

Authors: Julien Catala
Guillaume Cortes
Rémy Hryhoryszyn
Marc Peysale

“

“Augmented reality is defined as **computer-generated content**—which typically includes **graphics, audio** and other sensory enhancements—that is superimposed over **live images** to enhance the **real world**”

- The Wall Street Journal

6. **Evolutions**

Evolutions

Optimizations

- Improve the gameplay based on user feedback
- Improve ball tracking

Features

- Larger set of games
- Multiplayer mode
- Memorize user data (progress, scores)
- Dynamic sound output

Conclusion

Proof of concept
Demonstration of PapARt
Usable games
